OUR MODERN FACTORY
BLENDS THE LATEST
TECHNOLOGY WITH THE AGE
OLD EXPERIENCE OF QUALITY
BRITISH CRAFTSMANSHIP TO
CREATE THE MOST VERSATILE
AND VARIED RANGES OF
WOODEN MANTELPIECES
AVAILABLE TODAY.

UK CRAFTSMANSHIP

Established now for over 20 years, we stay ahead of the market by introducing stylish and original designs manufactured in Yorkshire using only the most reliable and majestic woods sourced from around the world. The beauty of our natural timbers ensures that each mantel bears distinctive hallmarks bestowing its own unique character and identity. Our collection offers over 50 mantel pieces with a full range of designs from classic to contemporary to the distinctively ultramodern. So let GB Mantels help you to create that warm welcoming fireplace you've always wanted, then sit back and relax safe in the knowledge that your fireplace has been crafted from the finest natural materials and treated with absolute tender loving care.

MADE TO MEASURE SERVICE

Every fire surround that we produce is individually handmade by skilled craftsmen at our factory in Yorkshire. Mantels are not mass produced and we do not buy or supply foreign imports. Therefore, to ensure that your every fireplace need is catered for, we offer a full "made to measure" service. Not only can you choose the exact size of your fire surround, but you can also choose from our range of 25 wood finishes to create a truly individual fireplace to suit your home. Any of our Approved Retailers will be happy to advise you of details and costs.

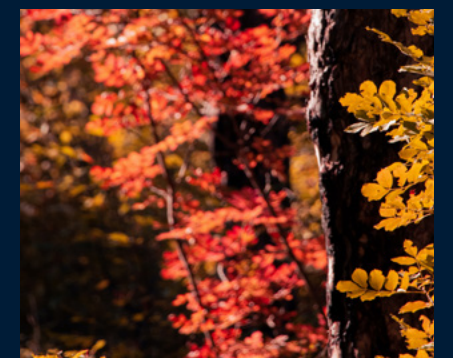

WE CARE

GB Mantels are committed to protecting the environment in which we all live. Our policy is to continually improve our environmental performance by preventing pollution, and where possible exceeding the applicable environmental guidelines. We fully comply with all relevant European legislations and commit to saving energy and recycling our waste to offset our carbon footprint and safeguard the planet for future generations.

PROTECTING THE PLANET

All of the natural woods that we use are sourced from well managed professional plantations that are approved by the FSC (Forest Stewardship Council) or the PEFC (Programme for the Endorsement of Forest Certification). These non-profit making associations independently inspect and evaluate forests of origin to ensure full forest replenishment schemes are adhered to, ensuring that you can purchase a mantel from us with the confidence that you are not contributing to the destruction of the world's forests.

INFORMATION

OUR PRODUCTS ARE HANDMADE BY SKILLED CRAFTSMAN AND THEREFORE MEASUREMENTS FOUND ON OUR WEBSITE ARE TO ACT AS A GUIDE ONLY AND MAY VARY SLIGHTLY. ALL OF OUR STANDARD FIRE SURROUNDS WILL ACCOMMODATE A 37" X 37" BACK PANEL AND OBSERVE CURRENT GAS SAFE AND HETAS GUIDELINES. CARE NEEDS TO BE TAKEN WHEN USING OUR "MADE TO MEASURE" SERVICE TO ENSURE THAT YOUR NEEDS ARE PROPERLY MET WHILST STILL FOLLOWING THESE IMPORTANT RECOMMENDATIONS. WE THEREFORE SUGGEST THAT ADVICE IS TAKEN FROM YOUR APPROVED STOCKIST AND A THOROUGH SURVEY IS CARRIED OUT BEFORE PLACING A BESPOKE ORDER. UNDER NO CIRCUMSTANCES SHOULD OAK VENEER MANTELS BE INSTALLED WITH SOLID FUEL, HIGH EFFICIENCY (HE) OR BALANCED FLUE (BF) GAS FIRES. IF FITTED IN THIS SITUATION, THE MANTEL MAY DE-LAMINATE DUE TO EXTREME TEMPERATURES. THESE INSTALLATIONS REQUIRE THE SOLID OAK, CAPITAL OAK OR PASTEL FINISH OPTION.

COLOUR & MATERIAL

Every effort has been made to replicate our colour swatches as accurately as possible, however our images should be used as a guide only. Colour and shade reproduction are as true as the digital process will allow and can vary due to photographic lighting and screen resolution. It is also common for oak materials to vary in colour because of timber shading and wood grains. Both solid and veneered woods are likely to encompass characteristics such as knots, blemishes, medullary rays, pith flecks and small flower splits. These natural occurrences are not faults in the product but are features found in solid wood and only enhance the beauty and personality of the product. It is our policy not to restock or exchange any product where the complaint is a natural occurrence in the wood.

MAINTENANCE

Your fireplace should reach you in perfect condition. However, we wish to advise you to inspect the surround for any damages before installation as we do not accept any liabilities for defects once it has been fitted or fixing brackets have been attached.

Once installed, our products are low maintenance. Please be respectful of the wood by protecting it from hot mugs and spillages. For everyday cleaning, either a damp or dry cloth will suffice. Avoid using abrasive cleaning products, especially ones that contain bleach as these could strip away the paint or lacquer finish.

LIGHTING

Downlights can completely transform the appearance of a fireplace, the soft warm glow of the lights enhances the focal point in your room. All our surrounds are available with the option of fully fitted downlights complete with plug and subtly placed switch. There are two LED (Light-Emitting Diodes) downlight options. Our Deluxe LED Lights have three slim diodes, whilst our Halogen LED Lights have two larger MR11 LED bulbs, both options are encased in a chic chrome holder and fully comply with the 2018 Energy Regulation (EC 244/2009).
